🌐 Portfolio

Professional Summary

Data Science / AI/ML Engineer with hands-on experience in Python and PyTorch, building end-to-end ML pipelines for data preprocessing, feature engineering, model training, and evaluation. Skilled in NLP, computer vision, and RAG-based semantic search systems. Experienced in developing interactive dashboards, deploying production-ready AI workflows with containerized solutions, and extracting actionable insights from complex datasets.

Technical Skills

- **Programming:** Python, SQL, Java, C
- **Data Science & ML:** NumPy, Pandas, Scikit-learn, PyTorch, Data Wrangling, EDA, Feature Engineering
- **NLP & CV:** Transformers (HuggingFace), OpenCV, MediaPipe, Selenium
- **Visualization & Tools:** Matplotlib, Seaborn, Plotly, Tableau, Power BI, Git, GitHub, Postman
- **Web & Databases:** REST APIs (Flask, FastAPI), Streamlit, MySQL, SQLite, PostgreSQL
- **Mathematics & Statistics:** Probability, Statistical Inference, Hypothesis Testing, Linear Algebra

Work Experience

Data Science Intern — Novas Arc Consulting Pvt. Ltd. (Remote)

Aug 2025 – Nov 2025

- Designed and implemented NLP-based pipelines for **10,000+ text records**, performing validation, normalization, and feature engineering for model-ready datasets.
- Automated FAQ extraction from **100+ dynamic web pages** using Selenium, reducing manual effort by **55–60%** and improving data consistency.
- Built text classification and context analysis models for intent, persona, tone, domain, and age group, enhancing response relevance by **20–30%**, and fine-tuned GPT-3.5 Turbo on custom datasets for improved chatbot interactions.
- Deployed a training-data-driven AI chatbot with iterative testing and logic refinement, streamlining responses and supporting downstream ML workflows.

Projects

Sahayak AI – Multimodal AI Assistant – Python, PyTorch, HuggingFace, FastAPI, Streamlit, Live GitHub

Qdrant, FAISS, SQLite

- Engineered a modular RAG system supporting PDFs, images, audio, video, YouTube links, and text, enabling hybrid semantic retrieval using Qdrant with FAISS/SQLite fallback for robust data access.
- Exposed RESTful APIs via FastAPI for embedding generation, semantic search, and summarization, integrated into end-to-end inference pipelines with PyTorch and HuggingFace.
- Containerized backend services using Docker for scalable deployment, optimized inference workflows, and reduced latency to improve system performance.

AttendEase – Smart Attendance System – Python, OpenCV, NumPy, Pandas

 GitHub

- Developed a real-time face recognition attendance system using the LBPH algorithm, achieving **90% accuracy** while sustaining **30+ FPS** for live performance.
- Implemented structured CSV-based logging for attendance, replacing manual roll calls, reducing errors, and improving operational efficiency.
- Optimized recognition via image preprocessing and feature extraction tuning to ensure consistent, accurate tracking in real-time scenarios.

Census App – Interactive Data Visualization – Python, Streamlit, Plotly, Pandas, NumPy

 Live  GitHub

- Built a Streamlit dashboard for **700+ districts** with dynamic filtering, aggregation, and drill-down visualizations.
- Integrated Plotly maps and charts, improving exploration efficiency by **40%** and enabling faster data-driven decisions.
- Developed structured backend pipelines to preprocess, aggregate, and transform large datasets, ensuring consistent, reproducible, and reliable visualizations.

Education

Faculty of Engineering and Technology, Agra College (AKTU)

B.Tech in Computer Science and Engineering

2022 – 2026

CGPA: 7.8/10

Certifications & Achievements

- **Global Rank 1040** – TCS CodeVita (537,000+ participants)
- Event Coordinator – Organized campus coding contests and workshops
- Solved **200+ DSA problems** across platforms (LeetCode, GFG)
- Geodata Processing (Python & ML) – **ISRO IIRS**, Feb 2025
