Professional Summary

Final-year B.Tech Computer Science student with experience in SQL-driven data analysis, backend system development, and workflow automation. Skilled in debugging data pipelines, implementing structured validation, and resolving inconsistencies across large datasets. Experienced in building REST-based systems and improving operational reliability through systematic troubleshooting and cross-team collaboration. Interested in data-driven problem solving at scale.

Technical Skills

- **Programming Language:** Python, Java, C
- **Databases & Querying:** SQL (MySQL, PostgreSQL, SQLite)
- **Data Analysis:** Pandas, NumPy, Data Cleaning, Aggregation, Exploratory Data Analysis
- **Backend & APIs:** FastAPI, Flask, REST APIs
- **Automation & Debugging:** Selenium, Structured Logging, API Testing (Postman)
- **Systems & Tools:** Linux, Docker (Containerization), Git, GitHub
- **AI/ML Exposure:** Scikit-learn, PyTorch

Work Experience

Jr. Software Engineer Intern — Novas Arc Consulting Pvt. Ltd. (Remote)

Aug 2025 – Nov 2025

- Designed and maintained a Python-based backend pipeline processing **10k+ text records** with standardized preprocessing, validation, and structured logging to improve reliability and reduce issue recurrence.
- Automated structured FAQ extraction from **100+ dynamic web pages** using Selenium, reducing manual effort by **50–60%** and improving data consistency.
- Integrated API-based AI services with structured exception handling and collaborated in Agile workflows using Git and AWS CodeCommit to diagnose pipeline issues and support stable feature deployment.

Projects

Sahayak AI – Backend Retrieval & API System – Python, PyTorch, FastAPI, Streamlit, [🔗 Live](#) [🔗 GitHub](#)
Qdrant, FAISS, SQLite, Docker

- Designed a modular backend system to process multimodal inputs and enable semantic retrieval across structured and unstructured data sources.
- Built REST APIs with input validation, structured logging, and hybrid retrieval logic (vector + relational fallback) to improve fault tolerance and reduce failed query scenarios.
- Optimized inference workflows and containerized services using Docker to ensure stable, reproducible, and production-ready deployment.

AttendEase – Smart Attendance System – Python, OpenCV, NumPy, Pandas

[🔗 GitHub](#)

- Engineered a real-time attendance tracking system achieving approximately **90%** recognition accuracy with sustained **30+ FPS** performance.
- Implemented timestamp-based logging and preprocessing optimizations to ensure data traceability and system stability.

Census App – Interactive Data Visualization – Python, Streamlit, Plotly, Pandas, NumPy [🔗 Live](#) [🔗 GitHub](#)

- Developed an analytics dashboard enabling structured filtering and aggregation across **700+ district-level** records.
- Designed data transformation pipelines to support analytical queries and consistent visualization workflows.
- Improved data exploration efficiency by organizing large datasets for faster regional trend analysis.

Virtual Trainer – Real-Time AI Fitness Coach – Python, OpenCV, MediaPipe

[🔗 GitHub](#)

- Built a real-time pose detection system using MediaPipe to analyze movement patterns and repetition counts.
- Designed structured feedback logic and optimized processing pipeline to maintain stable **30+ FPS** inference performance.

Education

Faculty of Engineering and Technology, Agra College (AKTU)

B.Tech in Computer Science and Engineering

2022 – 2026

CGPA: 7.82/10

Certifications & Achievements

- **Global Rank 1040** – TCS CodeVita (537,000+ participants worldwide) [🔗](#)
- Event Coordinator -- Organized campus coding contests and technical workshops. [🔗](#)
- Solved **300+ DSA problems** across competitive coding platforms. [🔗](#)
