🌐 Portfolio

Technical Skills

- **Programming Languages:** Python, SQL, Java, C
- **Backend Development:** FastAPI, Flask, REST API Design, Async Processing, Selenium
- **Databases:** MySQL, PostgreSQL, SQLite
- **Systems & DevOps:** Linux, Docker, Git, GitHub, Postman
- **Core Computer Science:** Data Structures & Algorithms, Operating Systems, OOP, DBMS
- **Applied AI:** PyTorch, Scikit-learn, NLP, OpenCV

Work Experience

Jr. Software Engineer Intern — Novas Arc Consulting Pvt. Ltd. (Remote)

Aug 2025 – Nov 2025

- Designed and maintained a modular Python backend service processing **10k+ structured records**, implementing input validation, structured logging, and centralized exception handling to ensure fault-tolerant execution.
- Engineered automated data ingestion pipelines extracting FAQs from **100+ dynamic web pages** using Selenium and REST API integration, reducing manual effort by **50–60%**.
- Implemented configurable timeout controls and exponential backoff retry logic to prevent indefinite blocking and improve pipeline resilience under unstable network conditions.
- Built NLP preprocessing pipelines and integrated LLM APIs to structure unstructured web data for automated ingestion workflows.
- Collaborated in Agile sprints using **Git** and **AWS CodeCommit**, enhancing code traceability and streamlining feature deployment cycles.

Projects

Sahayak AI – Multimodal RAG-Based Assistant – Python, PyTorch, FastAPI, Streamlit, 🔗 Live 🔗 GitHub
Qdrant, FAISS, SQLite, Docker

- Architected a multi-format ingestion backend supporting PDFs, images, audio, video, YouTube links, and text, implementing hybrid semantic search using Qdrant + FAISS/SQLite for scalable vector retrieval.
- Developed RESTful APIs using FastAPI integrated with PyTorch and HuggingFace models for embedding generation, semantic search, summarization, and real-time query handling.
- Leveraged asynchronous request handling in FastAPI to support concurrent query processing and reduce API response latency under multi-user load.
- Containerized inference workflows using Docker, optimizing dependency isolation and deployment consistency for production-ready ML services.

AttendEase – Smart Attendance System – Python, OpenCV, NumPy, Pandas

🔗 GitHub

- Built a **real-time face recognition attendance system** using the **LBPH algorithm**, achieving **80–90% accuracy** at **30+ FPS**.
- Automated attendance logging with a structured CSV backend, replacing manual roll calls and reducing operational errors.
- Tuned **preprocessing and feature extraction pipelines** for consistent recognition under varied lighting and camera conditions, enabling **scalable deployment** across campuses.

Census App – Interactive Data Visualization – Python, Streamlit, Plotly, Pandas, NumPy

🔗 Live 🔗 GitHub

- Developed an interactive Streamlit dashboard for **700+ districts**, enabling **dynamic filtering, aggregation, and drill-down visualizations** for census data exploration.
- Built backend pipelines to **preprocess, aggregate, and transform large datasets** efficiently, ensuring reliability and scalability for analytical use.
- Integrated **Plotly visualizations** and optimized API endpoints to handle multiple concurrent users, ensuring **responsive performance**, reducing query response latency and improving dashboard responsiveness, and enabling **actionable insights for decision-making**.

Education

Faculty of Engineering and Technology, Agra College (AKTU)

B.Tech in Computer Science and Engineering

2022 – 2026

CGPA: **7.82/10**

Certifications & Achievements

- **Global Rank 1040** – TCS CodeVita (537,000+ participants worldwide)🔗
- Event Coordinator - Organized campus coding contests and technical workshops.🔗
- Solved **200+ DSA problems** across competitive coding platforms.🔗
- Geodata Processing (Python & ML) - **ISRO - IIRS**, Feb 2025 🔗
