Portfolio

Professional Summary

AI Engineer with hands-on experience building RAG systems, LLM-powered applications, and NLP pipelines. Skilled in Python, FastAPI, HuggingFace Transformers, and vector databases. Built and deployed multimodal AI platforms integrating Groq and HuggingFace models with end-to-end backend infrastructure.

Technical Skills

- Languages:** Python, SQL
- AI/ML:** Machine Learning, Deep Learning, NLP, PyTorch, Scikit-learn, HuggingFace Transformers, Sentence-Transformers, Model Fine-tuning (LoRA/PEFT)
- LLM & GenAI:** LLMs, RAG, LangChain, Prompt Engineering, Embeddings, Groq API
- Retrieval & Databases:** FAISS, Qdrant, PostgreSQL, MySQL, SQLite, Vector Databases, Semantic Search
- Backend & Deployment:** FastAPI, Flask, REST APIs, Docker, Git, Linux, CI/CD, Model Deployment

Work Experience

Dynamix Networks — *Data Science Intern*

Jan 2026 – Apr 2026

- Architected an end-to-end fake news detection pipeline using TF-IDF feature extraction and supervised ML models (Logistic Regression/SVM) to enable automated, scalable credibility scoring across large, multi-source news datasets.
- Built concurrent data ingestion and ETL pipelines integrating Twitter API and Wikipedia sources with automated preprocessing, normalization, and feature engineering — supporting continuous dataset generation for model retraining.
- Designed optimized PostgreSQL schema for high-throughput time-series storage and retrieval; deployed a real-time inference interface via Streamlit, enabling interactive, low-latency credibility predictions for end users.

Novas Arc Consulting Pvt. Ltd. — *Software Engineer Intern (AI/ML)*

Aug 2025 – Nov 2025

- Engineered NLP pipelines processing **10,000+** FAQ records using TF-IDF and Transformer embeddings, with validation, normalization, and deduplication workflows to generate production-ready training datasets.
- Built a Selenium-based automated data ingestion system extracting structured data from 100+ dynamic web sources, performing multi-stage cleaning, entity normalization, and duplicate detection, reducing manual collection effort by **75–80%**.
- Designed semantic search using embedding retrieval, cosine similarity, and TF-IDF fallback; built multi-label text classifiers (intent, persona, tone, domain), improving retrieval relevance by **20–30%** and preparing JSONL datasets for LLM fine-tuning.

Projects

Sahayak AI — **Multimodal RAG System** *Python, FastAPI, LangChain, Qdrant, FAISS, JWT, Docker*

Live

GitHub

- Built a multimodal RAG system supporting PDF, image, audio, video, code, and CSV inputs using semantic chunking and Transformer embeddings; implemented end-to-end ingestion, retrieval, and LLM-based response generation pipelines.
- Designed fault-tolerant hybrid retrieval using Qdrant as primary vector store with FAISS/SQLite fallback and LangChain conversation memory; integrated multi-provider LLM support (Groq, HuggingFace) with automatic fallback.
- Built FastAPI backend with JWT authentication, role-based access control, and async request handling; deployed using Docker Compose with Streamlit frontend and multilingual support across 5 languages.

Pathwise AI — **Job Outreach Engine** *Python, FastAPI, PostgreSQL, Sentence-Transformers, LLM*

Live

GitHub

- Built job matching engine using Sentence-Transformer embeddings and semantic similarity ranking with TF-IDF fallback for relevance-based candidate matching.
- Developed multi-source job aggregation pipeline (Remotive, Adzuna, Jooble) with concurrent ingestion, deduplication, and LLM-assisted resume parsing and skill extraction.
- Automated personalized outreach generation using LLM prompt engineering, improving match relevance by **30%** and reducing manual recruiter effort by **50–60%**.

DataVista — **Analytics & ML Platform** *Python, FastAPI, Flask, PostgreSQL, Scikit-learn, Docker*

Live

GitHub

- Architected modular ML platform integrating **12+ services** (NLP, semantic search, prediction) through unified FastAPI REST APIs for scalable multi-domain AI workflows.
- Developed FastAPI and Flask backend services for real-time inference, SQL analytics, and high-volume data processing with optimized inter-service communication.

Education

Faculty of Engineering and Technology, Agra College (AKTU)

August 2022 - June 2026

B.Tech in Computer Science and Engineering

CGPA: 7.9/10

Relevant Coursework: Machine Learning, DSA, DBMS, Operating Systems, Computer Networks

Certifications & Achievements

- Global Rank 1040** — TCS CodeVita Season 12 (537,000+ participants worldwide)
- Geodata Processing using Python & ML** — ISRO IIRS Certification, Feb 2025
- Solved **300+** DSA problems on LeetCode and GeeksforGeeks
