Portfolio

Professional Summary

Backend Engineer with experience building scalable Python APIs, data pipelines, and AI-powered backend systems. Skilled in FastAPI, PostgreSQL, Docker, and async programming. Developed production-ready backend infrastructure for semantic search, vector databases, and multimodal AI workflows with end-to-end deployment experience.

Technical Skills

- Languages:** Python, SQL
- Backend & APIs:** FastAPI, Flask, REST APIs, Async Programming, Microservices, JWT, OAuth2
- Databases:** PostgreSQL, MySQL, SQLite, SQLAlchemy, FAISS, Qdrant
- DevOps:** Docker, Git, GitHub Actions CI/CD, Linux, Deployment
- AI/ML (Integration):** Scikit-learn, NLP, PyTorch, Transformers, HuggingFace, RAG Systems, LLM APIs (Groq)
- Data Handling:** Pandas, NumPy, ETL Pipelines, Web Scraping (Selenium)

Work Experience

Dynamix Networks — *Data Science Intern*

Jan 2026 – Apr 2026

- Built concurrent data ingestion and ETL pipelines integrating Twitter API and Wikipedia sources with automated preprocessing, supporting continuous, scalable dataset generation for a production inference backend.
- Designed and optimized a PostgreSQL schema for high-throughput time-series storage and retrieval, supporting an end-to-end fake news detection service.
- Deployed a real-time inference API and Streamlit interface, enabling low-latency, interactive prediction serving for end users.

Novas Arc Consulting Pvt. Ltd. — *Software Engineer Intern (Backend AI/ML)*

Aug 2025 – Nov 2025

- Engineered backend data pipelines processing **10,000+ FAQ records** with TF-IDF and embedding-based feature extraction, including validation, normalization, and deduplication for production-ready datasets.
- Built scalable text processing workflows for intent, persona, tone, and domain tagging using similarity-based evaluation, improving relevance by **20–30%** over baseline systems.
- Automated structured data collection from **100+ dynamic web sources** and generated JSONL datasets for downstream LLM fine-tuning, reducing manual effort by **75–80%**.

Projects

Sahayak AI — **Multimodal AI Platform** *Python, FastAPI, LangChain, Qdrant, JWT, SQLAlchemy, Docker* [Live](#) [GitHub](#)

- Built FastAPI backend with **25+ REST endpoints**, JWT authentication, role-based access control, GZip middleware, async request handling, and global exception management for a multimodal AI platform.
- Designed fault-tolerant hybrid vector storage using Qdrant as primary store with FAISS/SQLite fallback and auto-switching; built multimodal ingestion pipeline for PDF, audio, image, video, code, and CSV inputs.
- Integrated LangChain conversation memory and multi-provider LLM support (Groq, HuggingFace); deployed via Docker Compose with 3-service orchestration and Streamlit frontend.

Pathwise AI — **Job Outreach Engine** *Python, FastAPI, PostgreSQL, Sentence-Transformers, Async*

[Live](#) [GitHub](#)

- Built async FastAPI backend for multi-source job aggregation (Remote, Adzuna, Jooble) with concurrent ingestion, deduplication, and PostgreSQL persistence.
- Developed semantic job-resume matching system using Sentence-Transformer embeddings with TF-IDF fallback and LLM-assisted resume parsing, improving match relevance by **30%**.
- Implemented automated outreach system with Gmail API for personalized cold emails, reducing manual recruiter effort by **50–60%** and enabling end-to-end job outreach automation.

DataVista — **Analytics & ML Platform** *Python, FastAPI, Flask, PostgreSQL, Scikit-learn, Docker*

[Live](#) [GitHub](#)

- Built **12+ FastAPI and Flask microservices** with unified REST APIs for analytics, ML inference, and SQL data processing with optimized inter-service communication.
- Developed production ETL pipelines, SQL analytics services, and data transformation workflows with structured error handling and request validation.
- Deployed on Render with GitHub Actions CI/CD; containerized with Docker for reproducible production environments.

Education

Faculty of Engineering and Technology, Agra College (AKTU)

August 2022 - June 2026

B.Tech in Computer Science and Engineering

CGPA: 7.9/10

Relevant Coursework: DSA, DBMS, OOP, Operating Systems, Computer Networks, Software Engineering

Certifications & Achievements

- Global Rank 1040** — TCS CodeVita Season 12 (537,000+ participants worldwide)
- Geodata Processing using Python & ML** — ISRO IIRS Certification, Feb 2025
- Solved **300+ DSA problems** on LeetCode and GeeksforGeeks
