Portfolio

## Professional Summary

Data Analyst with hands-on experience in SQL, EDA, data cleaning, and dashboard development. Skilled in Python, Pandas, Plotly, and Streamlit. Experienced in transforming large-scale structured and unstructured datasets into actionable insights through statistical analysis, KPI reporting, and data visualization.

## Technical Skills

- Languages:** Python, SQL
- Data Analysis:** EDA, Data Cleaning, Data Wrangling, Feature Engineering, Statistical Analysis, KPI Reporting
- Visualization & BI:** Plotly, Matplotlib, Seaborn, Streamlit, Tableau, Power BI, Excel, Google Sheets
- Databases & SQL:** PostgreSQL, MySQL, SQLite, Joins, Window Functions, Aggregations, Query Optimization
- Libraries & Tools:** Pandas, NumPy, Scikit-learn; Git, Docker, FastAPI, REST APIs
- Core Concepts:** Statistics, Probability, ETL Pipelines, Business Intelligence

## Work Experience

**Dynamix Networks** — *Data Science Intern*

Jan 2026 – Apr 2026

*Tech: Python, Pandas, PostgreSQL, Streamlit, TF-IDF*

- Performed data cleaning, validation, and statistical analysis on large-scale, multi-source news datasets to support an automated fake news credibility-scoring system.
- Built ETL pipelines integrating Twitter API and Wikipedia sources with automated preprocessing and normalization, ensuring consistent, scalable dataset generation for reporting and model retraining.
- Designed PostgreSQL schema for time-series storage and reporting; deployed an interactive Streamlit dashboard for real-time credibility insights.

**Novas Arc Consulting Pvt. Ltd.** — *Software Engineer Intern (Data Analytics)*

Aug 2025 – Nov 2025

*Tech: Python, Pandas, SQL, PostgreSQL, Scikit-learn, NLP*

- Performed data quality validation, normalization, and statistical summarization on **10,000+ FAQ records** using TF-IDF and Transformer embeddings, producing high-quality datasets and structured JSONL training data for LLM fine-tuning.
- Generated performance reports using classification metrics (Precision, Recall, F1-score) for multi-label models (intent, persona, tone, domain), achieving a **20–30% improvement** in retrieval relevance.
- Automated structured data extraction from **100+ dynamic web sources** with multi-stage validation and normalization, reducing manual collection effort by **75–80%**.

## Projects

**Census Data Analysis Dashboard** *Python, Pandas, Plotly, Streamlit, SQL, Excel*

[Live](#) [GitHub](#)

- Developed interactive BI dashboard analyzing demographic trends across **700+ districts** using Pandas and Plotly, with dynamic filtering, drill-down visualizations, and automated data transformation pipelines.
- Cleaned, validated, and processed large-scale census datasets ensuring data accuracy and reproducible reporting; implemented SQL aggregation queries (joins, GROUP BY, window functions) for structured insights.
- Built Streamlit-based exploration interface for comparative regional analysis, enabling data-driven decision-making and reducing manual reporting effort.

**DataVista** — **Analytics & ML Platform** *Python, FastAPI, Pandas, Scikit-learn, Plotly, SQL, Docker*

[Live](#) [GitHub](#)

- Built modular analytics platform performing EDA, feature engineering, and predictive modeling using Pandas and Scikit-learn with cross-validation on structured datasets; developed SQL-based data pipelines for efficient querying and analysis.
- Designed interactive Plotly and Streamlit dashboards for KPI reporting and insights visualization; deployed production analytics services on Render with Docker and GitHub Actions CI/CD for reproducible workflows.

**Pathwise AI** — **Job Analytics Engine** *Python, FastAPI, PostgreSQL, SQL, Pandas, NLP*

[Live](#) [GitHub](#)

- Built ETL pipelines for aggregating job market data from multiple sources (APIs), including data cleaning, deduplication, and structured storage in PostgreSQL for analytics.
- Performed data analysis and feature extraction on job and resume datasets using SQL and Python, generating insights for candidate-job matching and ranking.
- Automated reporting pipelines, reducing manual effort by **50–60%** and enabling dstructured data-driven decision making.

## Education

**Faculty of Engineering and Technology, Agra College (AKTU)**

August 2022 - June 2026

B.Tech in Computer Science and Engineering

CGPA: 7.9/10

**Relevant Coursework:** Statistics, Probability, DBMS, DSA, Data Analytics

## Certifications & Achievements

- Global Rank 1040** — TCS CodeVita Season 12 (537,000+ participants worldwide)
- Geodata Processing using Python & ML** — ISRO IIRS Certification, Feb 2025
- Solved **300+ DSA problems** on LeetCode and GeeksforGeeks
