Portfolio

Professional Summary

Data Scientist with experience in machine learning, NLP, data analysis, and predictive modeling. Skilled in Python, SQL, PyTorch, and HuggingFace Transformers. Built end-to-end ML systems and AI pipelines involving data processing, feature engineering, model evaluation, semantic search, and deployment.

Technical Skills

- Languages:** Python, SQL
- Data Science & Machine Learning:** Exploratory Data Analysis (EDA), Statistical Analysis, Feature Engineering, Predictive Modeling, Model Evaluation (Precision, Recall, F1, ROC-AUC), Cross-Validation, Scikit-learn, PyTorch
- AI & NLP:** Neural Networks, Transformers, HuggingFace, Sentence-Transformers, Embeddings, Semantic Search
- Data Engineering:** Pandas, NumPy, Data Cleaning, ETL Pipelines, Web Scraping (Selenium), API Data Integration
- Databases & SQL:** PostgreSQL, MySQL, SQLite, Complex SQL Queries, Joins, Aggregations, Window Functions
- MLOps & Deployment:** FastAPI, Docker, Git, GitHub Actions, Linux, Model Deployment, REST APIs

Work Experience

Dynamix Networks — *Data Science Intern*

Jan 2026 – Apr 2026

- Performed feature engineering and statistical analysis on large, multi-source news datasets; trained and evaluated supervised classification models (Logistic Regression/SVM) for automated fake news credibility scoring.
- Conducted exploratory data analysis on data ingested from Twitter API and Wikipedia sources, building automated preprocessing and normalization pipelines for continuous dataset generation and model retraining.
- Designed a PostgreSQL schema for time-series storage and analysis; deployed a real-time Streamlit interface to validate model predictions interactively.

Novas Arc Consulting Pvt. Ltd. — *Software Engineer Intern (AI/ML)*

Aug 2025 – Nov 2025

- Performed data quality validation, normalization, and statistical summarization on **10,000+** FAQ records using TF-IDF and Transformer embeddings, producing high-quality labeled datasets for analysis and model training.
- Built and evaluated multi-label classification models (intent, persona, tone, domain), achieving a **20–30%** improvement in retrieval relevance over a TF-IDF-only baseline; prepared JSONL datasets for LLM fine-tuning.
- Automated structured data extraction from **100+** dynamic web sources with multi-stage validation and normalization, reducing manual collection effort by **75–80%**.

Projects

Sahayak AI — **Multimodal RAG System** *Python, PyTorch, HuggingFace, Qdrant, FAISS, FastAPI*

[Live](#)

[GitHub](#)

- Built multimodal RAG system processing PDF, audio, image, video, code, and CSV data using semantic chunking and Transformer embeddings with hybrid vector retrieval (Qdrant + FAISS).
- Implemented query rewriting, re-ranking, and conversation memory using LangChain, with multi-provider LLM integration (Groq, HuggingFace) and multilingual NLP support across 5 languages.
- Evaluated retrieval performance and optimized embedding generation using batch processing and cosine normalization, improving overall response relevance and system efficiency.

Pathwise AI — **Job Matching Engine** *Python, FastAPI, PostgreSQL, Sentence-Transformers, NLP*

[Live](#)

[GitHub](#)

- Developed NLP-based job-resume matching system using Sentence-Transformer embeddings with cosine similarity and TF-IDF baseline, achieving **30%** improvement in relevance over keyword-based methods.
- Built NLP pipeline for resume parsing, skill extraction, and feature engineering using LLM-assisted structured representation for candidate profiling.
- Designed multi-source job aggregation and evaluation framework with deduplication and performance tracking; implemented LLM-based personalized outreach generation, reducing manual effort by **50–60%**.

DataVista — **Analytics & ML Platform** *Python, FastAPI, Scikit-learn, Pandas, Plotly, SQL, Docker*

[Live](#)

[GitHub](#)

- Performed EDA, feature engineering, and predictive modeling (regression, tree-based models) on structured datasets using Pandas and Scikit-learn with cross-validation and standard evaluation metrics.
- Built interactive data visualization dashboards using Plotly and Streamlit for model interpretability and insights generation; developed SQL-based analytics pipelines using joins, aggregations, and window functions.

Education

Faculty of Engineering and Technology, Agra College (AKTU)

August 2022 - June 2026

B.Tech in Computer Science and Engineering

CGPA: 7.9/10

Relevant Coursework: Machine Learning, Statistics, Probability, DSA, DBMS

Certifications & Achievements

- Global Rank 1040** — TCS CodeVita Season 12 (537,000+ participants worldwide)
- Geodata Processing using Python & ML** — ISRO IIRS Certification, Feb 2025
- Solved **300+** DSA problems on LeetCode and GeeksforGeeks
