Portfolio

Professional Summary

ML Engineer with hands-on experience in supervised learning, NLP, deep learning, and end-to-end model lifecycle management. Skilled in PyTorch, Scikit-learn, HuggingFace Transformers, and feature engineering for classification and retrieval tasks. Built and evaluated production ML pipelines covering data preprocessing, model training, performance evaluation, and deployment.

Technical Skills

- **Languages:** Python, SQL
- **Machine Learning:** Scikit-learn, Regression, Classification, Clustering, Feature Engineering, Hyperparameter Tuning
- **Deep Learning & NLP:** PyTorch, Neural Networks, NLP, Transformers, HuggingFace, Transfer Learning, Model Fine-tuning
- **Data Processing & Evaluation:** Pandas, NumPy, Data Cleaning, Accuracy, Precision, Recall, F1-score, ROC-AUC
- **LLM & Retrieval:** RAG, LangChain, Sentence-Transformers, Embeddings, FAISS, Qdrant, Semantic Search
- **Backend & Deployment:** FastAPI, Flask, REST APIs, Docker, Git, Linux, CI/CD

Work Experience

Dynamix Networks — *Data Science Intern*

Jan 2026 – Apr 2026

- Trained and evaluated supervised classification models (Logistic Regression/SVM) on TF-IDF features for automated fake news credibility scoring across large, multi-source news datasets.
- Engineered feature pipelines integrating Twitter API and Wikipedia data sources with automated preprocessing and normalization, supporting continuous model retraining cycles.
- Validated model performance through a deployed real-time Streamlit inference interface, enabling iterative testing against live prediction outputs.

Novas Arc Consulting Pvt. Ltd. — *Software Engineer Intern (AI/ML)*

Aug 2025 – Nov 2025

- Engineered feature extraction pipelines on **10,000+** FAQ records using TF-IDF and Transformer embeddings, with validation, normalization, and deduplication workflows to generate production-ready training datasets.
- Built multi-label text classification models (intent, persona, tone, domain) and evaluated retrieval quality via cosine similarity scoring, achieving a **20–30%** improvement in relevance over a TF-IDF-only baseline.
- Prepared validated JSONL training datasets for LLM fine-tuning; automated structured data collection from **100+** dynamic web sources, reducing manual effort by **75–80%**.

Projects

Sahayak AI — **Multimodal RAG System** *Python, PyTorch, HuggingFace, LangChain, Qdrant, FAISS*

Live

GitHub

- Built embedding-generation and retrieval pipeline using Transformer-based Sentence-Transformer models with semantic chunking for multimodal inputs (PDF, image, audio, video, code, CSV).
- Experimented with LoRA/PEFT parameter-efficient fine-tuning for domain adaptation; implemented hybrid retrieval (Qdrant + FAISS fallback) with re-ranking for improved retrieval quality.
- Designed fault-tolerant model-serving architecture with multi-provider LLM fallback (Groq, HuggingFace); deployed via Docker with batch embedding processing for inference efficiency.

Pathwise AI — **Job Outreach Engine** *Python, Sentence-Transformers, Scikit-learn, FastAPI*

Live

GitHub

- Built AI-powered job matching system using Sentence-Transformer embeddings, cosine similarity ranking, and TF-IDF fallback to match resumes with relevant job opportunities, improving match relevance by **30%**.
- Developed LLM-assisted resume parsing and skill extraction pipeline with multi-source job aggregation, deduplication, and automated CSV generation containing company HR/employee details for targeted outreach.
- Implemented personalized cold email generation and automated Gmail outreach workflow, reducing manual job application effort by **50–60%**.

DataVista — **Analytics & ML Platform** *Python, PyTorch, Scikit-learn, FastAPI, Docker*

Live

GitHub

- Integrated **12+ ML and NLP services** (classification, semantic search, prediction) through unified FastAPI REST APIs for scalable multi-domain ML workflows.
- Developed and deployed ML/NLP inference pipelines using PyTorch and Scikit-learn for real-time prediction and semantic search with model evaluation and cross-validation.

Education

Faculty of Engineering and Technology, Agra College (AKTU)

August 2022 - June 2026

B.Tech in Computer Science and Engineering

CGPA: 7.9/10

Relevant Coursework: Machine Learning, DSA, DBMS, Operating Systems, Computer Networks

Certifications & Achievements

- **Global Rank 1040** — TCS CodeVita Season 12 (537,000+ participants worldwide)
- **Geodata Processing using Python & ML** — ISRO IIRS Certification, Feb 2025
- Solved **300+** DSA problems on LeetCode and GeeksforGeeks
