Portfolio

Professional Summary

Final-year B.Tech Computer Science student specializing in backend engineering and AI-powered systems. Experienced in developing scalable REST APIs, data pipelines, and ML-integrated services using Python, FastAPI, and Docker. Strong foundation in data structures, databases, and production-grade software development.

Technical Skills

- Programming Languages:** Python, SQL, Java, C
- Backend Development:** FastAPI, Flask, REST APIs, Async Programming, Selenium, API Design
- AI / Machine Learning:** PyTorch, Scikit-learn, Natural Language Processing (NLP), OpenCV, Transformers
- Databases:** PostgreSQL, MySQL, SQLite
- DevOps & Tools:** Docker, Linux, Git, GitHub, Postman, FAISS, Qdrant
- Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming (OOP), OS, DBMS

Work Experience

Jr. Software Engineer Intern — Novas Arc Consulting Pvt. Ltd. (Remote)

Aug 2025 – Nov 2025

- Engineered a modular Python backend service processing **10k+ structured records** with input validation, structured logging, and centralized exception handling.
- Built **Selenium-based data ingestion pipelines** extracting FAQs from **100+ dynamic web pages** and converting them into structured datasets.
- Generated JSONL training datasets and executed **GPT-3.5 Turbo fine-tuning workflows** on domain-specific FAQ data.
- Integrated **retry and timeout mechanisms** to improve pipeline stability under unreliable network conditions.
- Collaborated in Agile development using **Git** and **AWS CodeCommit** for version control and feature integration.

Projects

Sahayak AI – Multimodal RAG-Based Assistant – Python, PyTorch, FastAPI, Streamlit, [Live](#) [GitHub](#)
Qdrant, FAISS, SQLite, Docker

- Architected a **multimodal Retrieval-Augmented Generation (RAG)** system supporting PDFs, OCR images, audio/video transcription, text, and web URLs using semantic chunking and **Sentence-Transformer embeddings**.
- Designed a **hybrid vector search pipeline** using **Qdrant** with **FAISS + SQLite fallback** to ensure fault tolerance and offline retrieval.
- Implemented a modular **FastAPI backend** for ingestion, semantic search, summarization, transcription, and dataset generation; integrated an interactive **Streamlit** interface.
- Containerized backend, frontend, and vector database services using **Docker** for reproducible local and cloud deployment.

AttendEase – Smart Attendance System – Python, OpenCV, NumPy, Pandas

[GitHub](#)

- Implemented a real-time face recognition system using **Haar Cascade** for detection and **LBPH** for recognition, achieving **80–90% accuracy** at **30+ FPS**.
- Optimized image preprocessing pipelines to improve recognition stability under varying lighting and camera conditions.
- Automated attendance tracking with structured **CSV-based logging**, reducing manual record-keeping and ensuring consistent data capture.

Census App – Interactive Data Visualization – Python, Streamlit, Plotly, Pandas, NumPy

[Live](#) [GitHub](#)

- Designed an interactive **Streamlit dashboard** analyzing census data across **700+ districts** with dynamic filtering, aggregation, and drill-down exploration.
- Constructed preprocessing pipelines to clean, normalize, and aggregate large census datasets for structured analysis.
- Integrated **Plotly visualizations** and optimized data-loading logic for responsive multi-filter interactions.

Education

Faculty of Engineering and Technology, Agra College (AKTU)

2022 – 2026

B.Tech in Computer Science and Engineering

CGPA: 7.82/10

Certifications & Achievements

- Global Rank 1040** – TCS CodeVita (537,000+ participants worldwide) [🔗](#)
- Solved **200+ DSA problems** across LeetCode and GeeksforGeeks. [🔗](#)
- Geodata Processing (Python & ML) - ISRO - IIRS**, Feb 2025 [🔗](#)
- Tech Event Coordinator** - Organized campus coding contests and technical workshops. [🔗](#)
